

Stereotactic EEG (SEEG) is increasingly used as an alternative to subdural electrodes (SDE) for epilepsy surgery evaluations in the USA. As a step towards developing uniform standards for SEEG, we describe current practice among National

Association of Epilepsy Surgeons (NAES) member institutions. *Epilepsia*, 2017, Vol. 58, No. 1, pp. 1-10. doi:10.1111/epi.13610
